

Solaris unit

Blue Light Probe for killing infection

XP Light Pad delivers 7500mW of healing power!

# New for Wound Healing

We have two brand new tools to compliment your Solaris unit for complete wound healing!

The new Blue Light probe emits light at 405nm in the blue light spectrum and has been documented in double blind studies to effectively kill infection such as staphylococcus and pseudomonas.

The new Xp Light Pad allows unattended wound treatment with 7500mW of non-invasive healing power! The Xp Light Pad measures 8" x 10" (500cm<sup>2</sup>) allowing you to treat large areas like hips and hinnie. The Xp Light Pad is also flexible to treat tricky areas like the ankle, elbow and shoulder.
